

FinOps/Asset Intelligence & Analytics

For Systems, NetOps, FinOps & IT planning teams

1. Identify underutilized/unknown IT Assets
2. Find abandoned apps on servers
3. Find discrepancies (actual vs accounted)
4. Track asset compliance and plan of record
5. Business Risk rating from asset posture
6. Identify end-of-life or out of warranty assets
7. Accelerate change management with ADM
8. Make your CMDB complete and accurate

This solution provides real-time IT Asset Intelligence with business risk scoring, infra-toapplication dependencies, capacity/utilization insights, lifecycle EoS/EoL insights, support coverage insights and performance utilization.

Key Benefits
