

CloudFabrix Solutions

Powered by Robotic Data Automation Fabric (RDAF)

RDAF™ is world's first data fabric architected to unify Data Observability, AIOps & Automation Domains and take on the challenges of data intelligence and automation.

RDAF consolidates your disparate data sources, converges on the root cause by applying dynamic AI/ML pipelines and concludes by remediating with intelligent automation. Data-driven organizations should explore, evaluate and implement RDAF for faster innovation, faster time to value, meet SLAs and SLOs, and excel at customer experiences.

Key Tenets

- ✓ Generative AI Assistant
- ✓ Low code / No code platform
- ✓ Data Fabric technology built for IT
- ✓ Composable workflows
- ✓ Cloud native architecture
- ✓ Multi-tenancy & Multi-cloud support
- ✓ Customizable service catalogue

Platform Eng.

Operational Awareness

Composable Analytics

- Composable Dashboards
- Composable Services
- Observability Pipelines
- Composable Bots

DevSecOps/ITOps

Organizational Awareness

AIOps

- **Visibility**
 - X-domain Topology Discovery
 - Dependency Mapping
- **Insights**
 - Correlation Reduction
 - Predictive Analytics
- **Automation**
 - Root Cause Analysis
 - Remediation, ServiceOps

BizOps

Business Awareness

Solutions

- Telco Service Assurance
- SAP Observability
- Cisco FSO Solution
- FinOps
- Generative AI

Governance

1. AIOps

Helps IT and associated groups (DevSecOps) run their operations efficiently and in automated mode

- Faster MTTR/MTTD with automated RCA
- Proactive/predictive operations with reduced alert noise
- Unified single pane of view and control

2. Composable Analytics

Helps democratize data access across enterprise and tailor user experience and platform to meet stakeholder needs

- Supports IT and business leaders comprehensively
- low-code/no-code with Generative-AI capabilities
- Works with Cisco FSO platform and other data lake houses

3. Vertical/Custom Solutions

Helps optimize costs and improve customer experience through asset intelligence and service assurance services

- Cost optimization through utilization insights
- Compliance and risk management insights
- Service assurance for targeted markets and domains e.g Telco/ Service provider etc
