

# CloudFabrix Data-centric AIOps Platform delivers, Unified & Composable Analytics for Cisco FSO Solution

Maximize the potential of the Cisco FSO solution suite with seamless integration of application performance monitoring from AppDynamics and Digital Experience from Thousand Eyes, complemented by CloudFabrix's Data-centric AIOps, to revolutionize your IT operations and optimize performance.

This exceptional solution empowers you to achieve remarkable Business-IT alignment and encompasses a wide range of IT operations domains, including DevSecOps, BizOps, and NetOps. With comprehensive full-stack asset context and advanced composable analytics capabilities driven by AI/ML, you can unlock unparalleled efficiency and productivity.

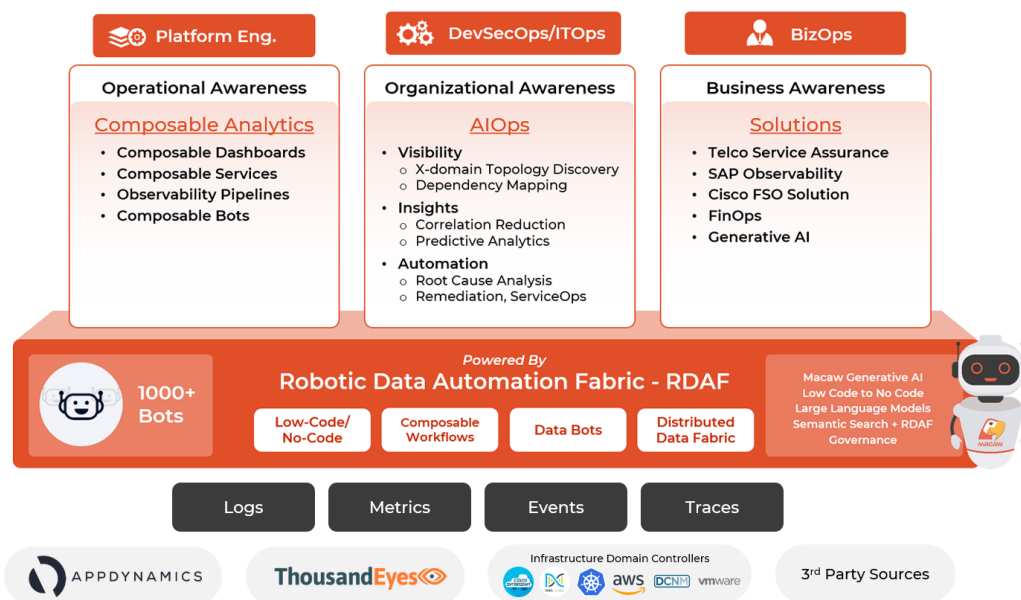

# Solution Overview

CloudFabrix's industry-leading Data-Centric AIOps solution, seamlessly integrates with Cisco FSO solution and associated tools, including AppDynamics, Thousand Eyes, and other hybrid-cloud tools providing out-of-the-box support for these essential components.

With pre-built and deep integrations, the solution offers a unified experience, eliminating silos and streamlining various aspects of IT operations. IT Ops teams and leaders can now navigate effortlessly through different domains using its in-built discovery capability. This advanced feature collects asset data from diverse domains and links them together, offering comprehensive end-to-end topology views that cover business services, applications, and infrastructure across multi-cloud and hybrid-cloud environments.

The solution provides the enrichment of ingested MELT (Metrics, Events, Logs, and Traces) data from the Cisco FSO suite. The ingested data is automatically enriched with additional context, including impact maps and asset metadata, empowering service operations teams in root cause analysis and enabling faster, informed decision-making. Through the application of machine learning (ML) algorithms, the enriched data is further processed for improved cross-domain correlation and predictive insights, leading to reduced ticket volumes and proactive operations.

To enhance its value, the solution seamlessly integrates with IT Service Management (ITSM) tools and Collaboration tools such as ServiceNow, Jira, Slack, MS Teams, Cisco Webex etc.,. This integration enables efficient incident management and overall service delivery improvements, providing DevSecOps teams ease of use and seamless collaboration. Another key aspect of the solution is its support for Composable Analytics, powered by the Robotic Data Automation Fabric Platform and its low-code/no-code and Generative-AI capabilities.

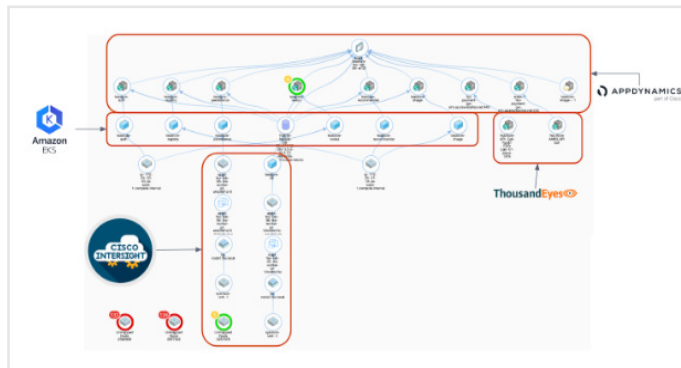

## Highlights

- ▶ Will be available as a bundle solution from Cisco & CloudFabrix sales/channels
- ▶ Cross Domain topology discovery for end to end visibility Enrichment with contextual insights and dependency mapping
- ▶ Root cause analysis with deep link and cross launch across domains
- ▶ ServiceOps integration and automation - Ticket Mgmt. and Collaboration

# Key Outcomes from CloudFabrix AIOps and Cisco FSO Integrated Solution

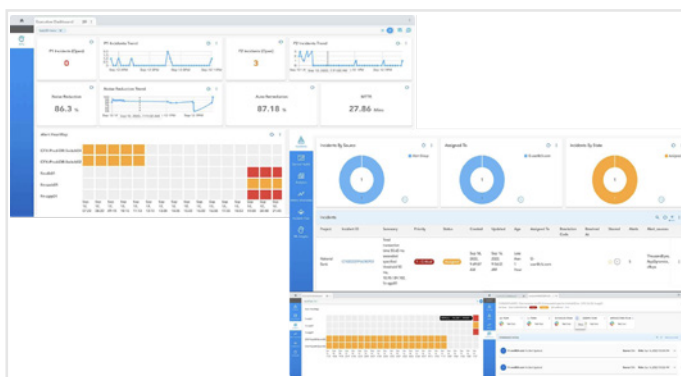

## Cross-Domain asset & topology linkage for enhanced observability experience

- ▶ **Unified end to end visibility** : Complete visibility and control
- ▶ **More accurate event correlations**: Actionability in Incidents
- ▶ **More accurate root cause/impact analysis**: Improved MTTD/MTTR
- ▶ **Enhanced Observability Experience**: BizOps, Experience Desk, Customer Success etc.

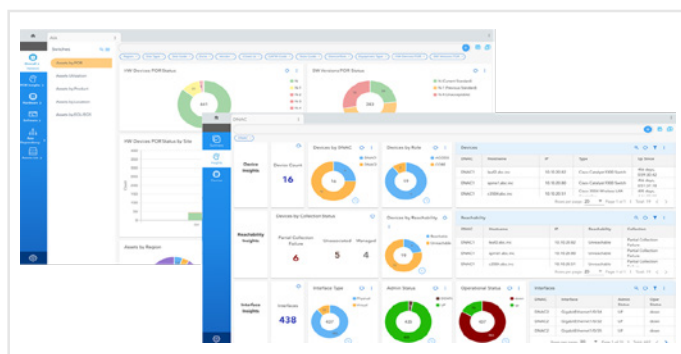

## Telemetry data enrichment, correlation and incident analytics/remediation

- ▶ **Business Personas**
  - ▶ Track Business KPIs and its impact on IT
  - ▶ Improved efficiencies in IT through AIOps
- ▶ **ITOps, DevSecOps**
  - ▶ RCA and collaboration
  - ▶ Predictive Anomalies and insights
- ▶ **DevOps/Platform Ops**
  - ▶ Build CI/CD AIOps pipelines
  - ▶ Ask ad-hoc questions with cfxQL

## Persona-based composable analytics and services

- ▶ **Transformation assessment/initiatives**: Manual->Automated asset insights
- ▶ **Path to FinOps**: Capacity planning with asset utilization insights
- ▶ **Stay compliant and reduce risk**: Full lifecycle insights e.g. EOL/EOS, POR etc.
- ▶ **Vertical solutions**: Telco Assurance etc.
