

FinOps/Asset Intelligence & Analytics

Real-time Visibility into IT Assets, Dependencies and their Lifecycle Data

1. Identify underutilized/unknown IT Assets
2. Find abandoned apps on servers
3. Find discrepancies (actual vs accounted)
4. Track asset compliance and plan of record
5. Identify end-of-support assets
6. Accelerate change management with ADM
7. Make your CMDB complete and accurate

This solution provides real-time Asset Intelligence with in-depth insights about extensive metadata for every asset, infra-to-application dependencies, capacity/utilization insights, EoS/EoL insights, support coverage insights and performance utilization.

Key Benefits
