Path Forward=>Unified & Data Driven Approach With AI/ML

Blueprint For Successful Business Outcomes With AIOps – MSP

TCO saving over \$1M with AIOps

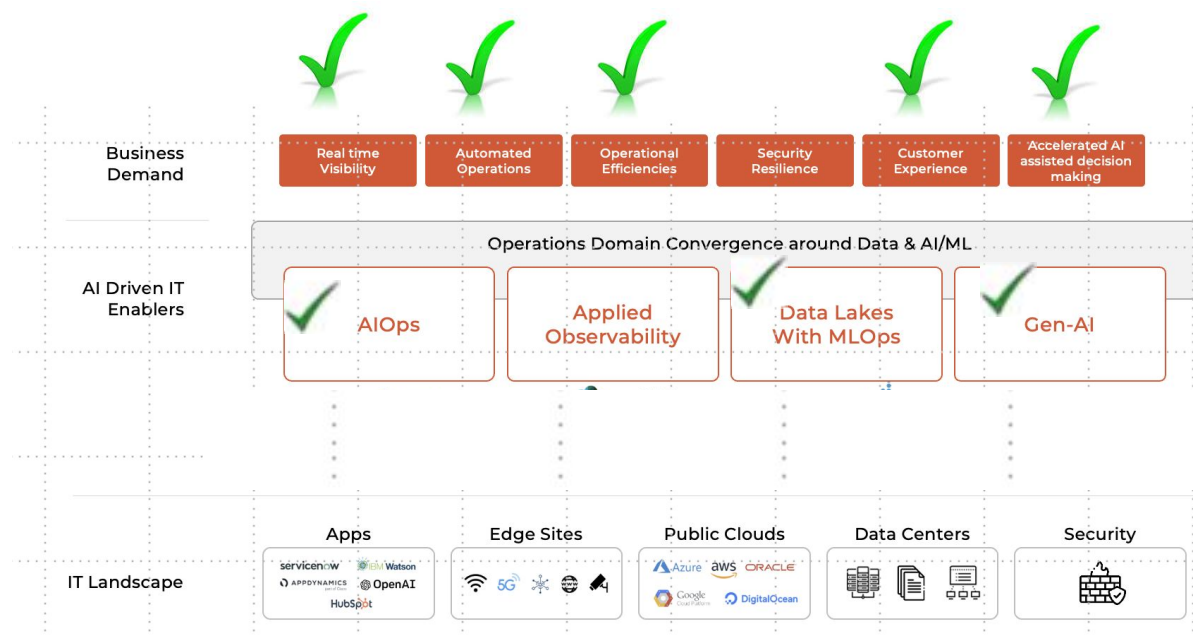

Service Assurance With Unified Data & AI/ML

Tier1 Global Telecom Operator (USA) requested their system integrator (SI) for a solution to reduce operational complexity and costs with unified observability and AI/ML

With CFX Solution

- ❑ Unified collection & visualization at scale: 1M+ events/Sec, 5k+ users
- ❑ Retired 10+ tools, saving \$1M+ OPEX
- ❑ Predict business impact with IT performance data
- ❑ 30% lower NOC/SOC costs; fewer tickets, actionable insights, lower MTTR

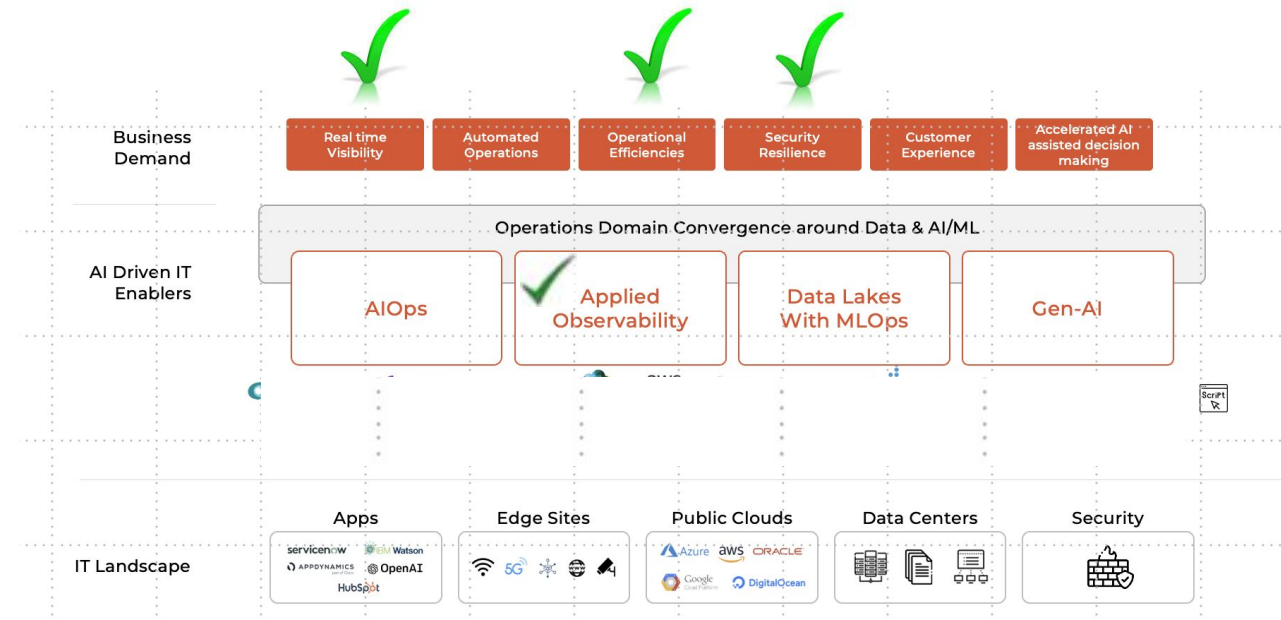

Asset Intelligence With Upstream/Downstream Dependencies

A healthcare provider with over 800 sites across the USA with networking equipment scattered across multiple states, required for continuous compliance assessment and visibility of impacts for effective change management

With CFX Solution

- ❑ 100% asset visibility with detailed analysis/views
- ❑ 40% lower OPEX – automated compliance reports, change approvals
- ❑ 90% fewer change related incidents
- ❑ 20% reduction in annual CAPEX growth

Opex Spend Reduction

A CIO for a Tier 1 Telco in India set a goal for the team to reduce OPEX budget by 30%. The directive was to review asset utilization, reduce service level agreements costs, identify the savings and penalty risks – any/all possibilities to make reduction

With CFX Solution

- ❑ Enhanced Efficiency: Retired tools, saved 10 FTEs
- ❑ Streamlined Operations: 70% fewer tickets, 40% faster resolutions
- ❑ Reduced risk with improved SLA compliance
- ❑ Accelerated Rollouts: 150% faster, intelligent asset management.
